Contaminant – Complete Game Plan

Oct 9, 2026 · @L

1. Match structure and AP economy

A match is a simultaneous-planning tactics duel on a hex board. Both players plan in secret for 30 seconds, every action then resolves in Priority → Speed order, and the first side to 100 Victory Points (VP) wins, or the one that wipes out the other team. All rules from your two documents are kept; numbers I added to fill gaps are marked (new).

Board and setup

Item	Rule
Grid	Pointy-top hex grid, 15 columns × 9 rows = 135 tiles (new)
Sides	Coin flip: left or right. Your deployment zone is your outer third (columns 1–5 or 11–15)
Obstacles	12–18% of tiles are Wall-Obstacles (HP 120, PDef 60, SDef 60). They block movement and Line of Sight. The generator guarantees at least 2 separate walkable routes between the sides
Terrain	8–12% of tiles start as Water, Overgrowth or Ice. One Control Field sits in the centre (column 8, row 5)
Decks	Character Deck = 10 characters, Item Deck = 20 cards (section 6)
Level	Friendly matches: every card is Level 10. Ranked and bot matches: each card uses its own level

Round loop

1. **Start of round:** collect AP (Base + Random + Idle Bonus + queued KO/Trade AP), draw 1 item card, re-roll the 4 offered characters for free (locked ones stay).
2. **Planning, 30 s, secret and simultaneous:** give commands, play item cards, deploy characters. You see the board as it was at the end of the last round. Enemy deployments only show as a pop-up ("enemy deploys a character"), never who or

where.

3. **Resolution:** all plans are validated, then sorted by Priority, then Effective Speed, then random on an exact tie. Actions run one at a time and the state updates after each one. An action whose actor is KO'd, or whose target is gone or out of range, fizzles. Its AP stays spent, but the attack's use-limit is not consumed.
4. **End phase, fixed order:** field effects → status ticks → regeneration and healing triggers → summon expiry → objective VP → KO rewards queued.
5. **Win check.** If nobody has won, the next round starts.

Actions of one character always stay in the order the player queued them. Different characters are interleaved by Priority and Speed.

Priority	Used for
+4	Deployments (all reveal together)
+3	Item cards of type Character, Field, Intel, and Gear equipping
+2	Reaction abilities (Midas Touch)
+1	Transformations and set-ups (Werewolf transform, Voodoo Doll, Fuse)
0	Normal movement, attacks, abilities
−1	Slow heavy attacks (marked in the roster)
−2	End-of-Resolution effects (Turn Back Time)

Planning commands

- **Commands:** Move, Attack, Ability, Wait, Hold Position, and a Rest checkbox. Rest halves that character's Effective Speed for the whole round.
- **Hold Position (0 AP):** the character does not move voluntarily, ignores the first tile of any forced movement and takes −10% damage from the first hit it receives this round (new).
- **Queue limit (new):** at most 4 commands per character and round: up to 2 Move commands (total distance ⩽ Max Move), up to 3 Attack/Ability commands in total. Each attack respects its own Max Uses per round (default: Attack 1 = 2, Attack 2 = 1).
- **Speed roll:** every character gets a small visible random modifier of −6% to +6% at the start of planning (new). You always see the resulting action order of your own team and can plan around it.

AP economy

$$\text{Base AP}(R) = \min\bigl(16,\; 10 + \lfloor (R-1)/2 \rfloor\bigr)$$

This gives 10 AP in rounds 1–2, 11 in rounds 3–4, and so on up to 14 in rounds 9–10, as in your table. It continues to 15 (rounds 11–12) and caps at 16 from round 13.

Source	Value
Random AP, rounds 1–5	+0 / +1 / +2 with 30% / 40% / 30%
Random AP, round 6+	+0 / +1 / +2 / +3 with 20% / 35% / 30% / 15%
Idle Bonus	Spend less than 50% of the round's AP → next round +3 guaranteed. It stacks +3 per round up to +12. Spend 50% or more and the whole bonus disappears next round
KO reward (AP)	Paid at the start of the next round: Swarm +4, Standard +10, Elite +12, Boss +15
Hard cap	30 AP in one round (new). Unspent AP is lost

Spend	Cost
Deploy a character	Its Deploy AP (1–8)
Move	ceil(fields × Move AP per field) per Move command. Most characters pay 1 AP per field
Attack	1–4 AP, listed on the attack
Ability	0–3 AP, listed on the ability
Item card	AP cards cost 1–4 AP. Free cards cost 0 AP but have a requirement (section 8)
Re-roll offered characters	1 AP for one card, 3 AP for all unlocked cards (new; the "all" discount from your notes)
Rest, Wait, Hold Position	0 AP

Victory points

Source	VP
KO of a Swarm unit	+4
KO of a Standard unit	+10
KO of an Elite unit	+12
KO of a Boss or Anomaly	+15
KO of a fused Zombie (Patchwork / Brute)	+8 / +10
Control Field held at round end (your unit on it, no enemy unit on it)	+3 per round
Research Terminal hacked (adjacent unit, 1 AP, once per terminal every 2nd round)	+5
Lab Objective held 3 rounds in a row	+15 once
Vacancy tax: you have no character on the board at round end	Opponent +3, then +1 for each further empty round, max +8

Summons (Shrink Heads, Mini Arachnia, Candle, Mud Decoy, Voodoo copy, Cooking Pot) give no VP and no AP when destroyed. They also do not count as "a character on the board".

Game modes

Mode	Win condition
CONTAMINATION (default)	First to 100 VP, or the opponent has no unit on the board and no card left to deploy
ELIMINATION	All 10 enemy characters KO'd
DOMINATION	First to 75 VP, 3 Control Fields (centre and both flanks), +3 VP per field per round
RESEARCH	First to 90 VP, 3 Research Terminals
ESCAPE	One character reaches the far deployment zone with 1 AP left
ANOMALY	Defeat a Boss with buffed stats; 150 VP cap

Deployment

- A deployed character costs its Deploy AP and is placed on a free tile of your zone. It appears at Priority +4 together with the enemy's deployments.
- A character cannot act in the round it is deployed, except for "On Deploy" choices (Nexus re-rolls, Pokerface mood, Candle placement, Swamp Heart tile).
- At most 5 characters on the board at once. Summons do not count.
- Each round the game offers 4 random characters from your undeployed cards. You can lock any of them. Deploying one immediately replaces it with a random remaining card.

2. Core math: stats, damage, hit chance, ranges

Every number in the game flows through one damage formula, one hit formula and a few fixed scales. Damage has no random roll. Randomness is limited to hit chance, crits, status chances, speed ties, small AP bonuses and card draws, as in your rule list.

Stat scales

Stat	Range	Notes
HP	Swarm 80–150, Standard 230–420, Tank 480–600	Level scales it
PAtk / SAtk	20–110	Physical vs Special attack
PDef / SDef	25–100	Matching defense
Speed	40–160, average 100	Decides action order
Max Move	0–5 fields per round	Total of up to 2 Move commands
Move AP per field	0.5 / 0.75 / 1.0 / 1.25	Your "Activity Cost Multiplier"
Deploy AP	Swarm 1–2, Standard 3–6, Elite 7–9	Also sets the KO reward tier

Budget rule: the four attack and defense stats add up to 120–170 for Swarm, 230–320 for Standard and 265–300 for Elite. Fast or utility characters sit at the low end, and Elites pay for their stronger kits with complexity, not raw stats.

Category and damage tag

Each attack has a **category** and a **tag**. The category picks the stats: Physical uses PAtk against PDef, Special uses SAtk against SDef. The tag picks which characteristic multipliers apply.

Group	Tags
Physical forms	Blunt, Slash, Pierce
Energy forms	Fire, Electric, Toxic, Acid, Sonic, Psychic, Soul, Radiant

A Special attack can be melee, and a Physical attack can carry an element (Frankenstein's fist is Physical / Electric).

Damage formula

```
\text{Damage} = \text{Power} \times
\operatorname{clamp}\!\left(\tfrac{\text{Atk}}{\text{Def}},\,0.5,\,2.0\right)
\times T \times C \times M \times L
```

- **T (tag multiplier):** product of all characteristic multipliers that apply to the attack's tag, clamped 0.5–1.75. Weak ×1.25, strong weak ×1.5, resist ×0.8, strong resist ×0.6, immune ×0.
- **C (crit):** 1.5 on a crit, and the hit ignores 25% of the target's Defense. Otherwise 1. Attacks may list their own crit effect.
- **M (modifiers):** 1 + sum of status, field, ability and item modifiers, clamped 0.4–2.5. Examples: Vulnerable +0.20, Spotlight +0.25, Empowered +0.25, Weakened −0.20, Depressed −0.25.
- **L (level):** 1 + 0.10 × (Level − 1). It scales HP and Power only, never AP, items or fields.
- Round to the nearest whole number, minimum 1.

Example: Arachnia's Poison Bite (Power 60, PAtk 85) against PDef 70 deals 60 × 1.21 = 73. Against a Steel target (Pierce ×0.8) it deals 58.

Hit chance, crit and status chance

```
\text{Hit\%} = \operatorname{clamp}\bigl(5,\,100,\; \text{Acc} +
\text{AttackerMods} + \text{DefenderMods} + \text{FieldMods} +
\text{AbilityMods}\bigr)
```

Modifier	Value
Blind (attacker)	−30
Jinx (attacker)	−10
Perceptive (attacker)	+10
Marked (defender)	+15
Darkness or Fog on the path (not Perceptive)	−15
Arachnophobia (Emotional attacker at range 1–2 vs Arachnia)	−10
Alone, Devoted (no friend within 3 tiles)	−10
Multi-Minded, first action of the round	−10

- **Area and Field attacks** (Acc shown as "—") cannot miss. They hit every unit on the affected tiles.
- **Crit chance** = the attack's Crit% plus modifiers. Crit damage is ×1.5.
- **Status chance** = listed chance × (1 − target resist). One roll per hit. Re-applying a status refreshes its duration up to its stack limit.

Targeting and Line of Sight

- **Character Target (homing):** needs the target in Range and Line of Sight at the moment it executes. If the target moved but is still in range and sight, the attack follows it. Otherwise it fizzles.
- **Field Target:** hits the tile and whoever stands there when it resolves, friends included. Field attacks ignore Line of Sight.
- Unless an attack says "ignores LOS", Character-Target attacks are blocked by Obstacles and Fog.
- **Friendly fire:** every attack, heal and card may target any unit unless the card says otherwise.

Range bands and area shapes

Band	Hex distance
Short	1
Low	2

Band	Hex distance
Mid	3–4
Mid-High	5–6
High	7–8
Extreme	9 (hard maximum)

Shape	Tiles
Ring-1 (neighbours only)	6
Burst-1 (centre + ring)	7
Ring-2 / Clock Ring	12
Burst-2	19
Burst-3 (radius 3)	37
Cone-3 (rows of 2, 3, 4)	9
Star-2 (your "X shape": centre + 6 arms of length 2)	13

Forced movement: Knockback and Pull move a unit along the attack line. If the move is blocked by an Obstacle or unit, the moved unit takes 8% max HP (Blunt) and the blocker takes 4%. Swap and Teleport ignore blockers on the path but need an enterable destination.

AP cost budget (design rule for new attacks)

Target 24–34 expected damage per AP at Atk = Def: Power × Acc ÷ 100 × (1 + 0.5 × Crit) ÷ AP. Range, area and utility sit at the low end, short-range melee at the high end.

AP	Typical Power
1	up to 35
2	45–70
3	70–100
4	100–130

Add +1 AP (or subtract about 15 Power) for each of: a status chance of 35% or more, repositioning the user, an auto-hit area of Ring-1 or larger, Range 5 or more. Your examples fit this: Toxic Needle (60, 95%, 2 AP) gives 28.5 per AP, Unstable Mutation (110, 70%, 3 AP) gives 25.7 per AP.

Tuning and card levels

- **Tuning:** before the match every character gets 8 Tune Steps (new). One step = +2% to HP, PAtk, PDef, SAtk, SDef or Speed. Maximum 5 steps (+10%) per stat. Lowering a stat by one step (−2%) refunds one step, up to 3 refunds. Your example "+5 HP, +2 PAtk, +1 SDef, −1 Speed" is a valid package.
- **Levels 1–10:** each level adds +10% HP and Power.

$$\text{Duplicates}(L) = 2(L-1) \qquad \text{Gold}(L) = 75\,(L-1)^2$$

Reaching Level 10 costs 18 duplicates and 6,075 gold for that step. All 9 steps together need 90 duplicates. Duplicates drop much more often than new cards (section 6).

3. Characteristics: buffs and weaknesses

Every character has exactly one characteristic in each of five categories, and every characteristic carries one always-on buff and one always-on weakness. Your old categories stay. I added 17 new characteristics (marked new) so the new roster has real variety, and I suggest renaming "Biological" to **Trait**, because clockwork, electric and time traits do not fit "biological".

Rules: multipliers from several characteristics multiply, then clamp to 0.5–1.75 (section 2). "Immune" overrides the clamp. A character ability can override a characteristic (Vile turns Poison into healing). Items can carry a characteristic too (section 8).

Material (what the body is made of)

Characteristic	Buff	Weakness	Used by
Organic	Healing received +20%	Toxic and Acid damage ×1.25	Arachnia, Vile, Mycel, Pumpkin, Steak, Frankenstein, Siren, Shrink Heads, Termite, Mambo, Werewolf, Zombie Limb, Lab Assistant, Leech Cook
Steel	Slash and Pierce ×0.8	Electric ×1.25	Ballerina

Characteristic	Buff	Weakness	Used by
Crystal	Radiant ×0.6, Psychic ×0.8	Blunt ×1.25, Sonic ×1.5	Crystal Eye
Liquid	Slash and Pierce ×0.8	Fire ×1.25, Frozen lasts +1 round	Cruorina
Gas	Blunt, Slash, Pierce ×0.7. Knockback and Pull distance −1	Fire ×1.5 (also ignites: Burn), Electric ×1.25	Will-o-Wisp
Synthetic	Immune to Poison and Infection	Acid ×1.25, Corrosion lasts +1 round	Nexus, Piggybank, Pokerface, Chimp
Bone (new)	Slash and Pierce ×0.75, immune to Bleeding	Blunt ×1.25, Sonic ×1.25	Calaca Flamenca
Cloth (new)	Blunt ×0.75	Fire ×1.5, Acid ×1.25	Lullabun, Midas Mummy, Baby Mummy
Wood (new)	Blunt ×0.8, Electric ×0.5	Fire ×1.5, Slash ×1.25	Scarecrow, Cog Cuckoo
Ether (new)	Immune to Bleeding and Corrosion	Sonic ×1.25, Psychic ×1.25	Ghost Train Employee, Little Wendigo

Existence (what kind of being it is)

Characteristic	Buff	Weakness	Used by
Living	Healing received +10%	Soul ×1.25, chance to be Infected +25%	Arachnia, Mycel, Pumpkin, Steak, Piggybank, Ghost Train, Siren, Mambo, Lab Assistant, Leech Cook
Dead	Immune to Bleeding and Infection	Radiant ×1.25. Healing received −30%, except from Poison, Souls, Marigold and Bandage fields	Vile, Calaca Flamenca, Zombie Limb
Spectral	Blunt, Slash, Pierce ×0.8. No collision damage	Radiant ×1.25, Soul ×1.25	Cruorina, Will-o-Wisp, Crystal Eye

Characteristic	Buff	Weakness	Used by
Artificial	Poison and Infection last 1 round shorter	Healing received −25% (Repair items excluded), Shock lasts +1 round	Nexus, Lullabun, Ballerina, Scarecrow, Frankenstein, Pokerface, Chimp, Cog Cuckoo
Colony	Single-target attacks ×0.85	Area attacks (ring, burst, cone, line, star) ×1.25	Shrink Heads, Termite Mound
Cursed (new)	Soul and Psychic ×0.75	Radiant ×1.25. On Sterile Fields −5% max HP per round	Midas Mummy, Baby Mummy
Mythic (new)	Immune to Fear, status chances against it −20%	Radiant ×1.25, Fire ×1.25	Moonbound Werewolf, Little Wendigo

Movement (how it moves)

Characteristic	Buff	Weakness	Used by
Grounded	+10% PDef and SDef if it did not move this round	Ground fields hit it fully. Cannot cross Obstacles	most characters
Amphibious	Water and Swamp tiles cost 0 AP. Heals 5% max HP at round end on Water or Swamp	Electric ×1.25 while on Water. Speed −10% on Fire, Ash and Sterile tiles	Swamp Siren
Airborne	Ignores ground fields (Water, Ice, Toxic, Acid, Swamp, Overgrowth, Snare, Bandage, Scalded, Corrupted, ground Electric)	Pierce ×1.25, knockback +1 tile	Cruorina, Will-o-Wisp, Crystal Eye
Rooted (new)	PDef and SDef +20%. Immune to enemy Knockback, Pull, Swap and Teleport	Max Move 0 (it moves only through its own abilities). Fire ×1.25. Field damage ×1.25	Pumpkin, Termite Mound

Characteristic	Buff	Weakness	Used by
Burrowing (new)	Moves through Obstacles for +1 AP per tile (cannot end inside). Ignores Snare and Swamp slow	Cannot burrow under Water, Swamp or Ice. Sonic ×1.25	Zombie Limb
Phasing (new)	Moves through units and Obstacles (cannot end inside). No collision damage	Solid on Resonance and Sterile tiles. Soul ×1.25	Little Wendigo

Trait (special body or nature)

Characteristic	Buff	Weakness	Used by
Toxic	Poison ticks on it deal −50%. Toxic damage ×0.5	Sterile Fields −5% max HP per round. Acid ×1.25	Arachnia, Vile
Viral	Infection it applies spreads at 40% instead of 25%	Fire ×1.25. Sterile Fields suppress its spread	Nexus, Shrink Heads, Zombie Limb
Parasitic	Heals 15% of the damage it deals to Organic and Living targets	Deals −20% damage to Steel, Crystal, Synthetic and Gas targets	Mycel, Steak, Termite, Wendigo, Leech Cook
Regenerative	+4% max HP at the start of each round	Regeneration pauses 1 round after Fire or Acid damage. Radiation Fields switch it off	Cruorina, Siren, Will-o-Wisp
Photosynthetic	+5% max HP at round end (+8% on Overgrowth), not in Darkness	Darkness: −10% damage. Fire and Toxic ×1.25	Pumpkin
Perceptive	+10% Accuracy. Sees Hidden units and Traps within 3 tiles	Blind lasts +1 round, Sonic ×1.25	Lullabun, Scarecrow, Ghost Train, Crystal Eye, Mambo, Baby Mummy

Characteristic	Buff	Weakness	Used by
Robust	Defense cannot be lowered (Corrosion, Brittle)	Speed −10%, Slow lasts +1 round	Ballerina, Piggybank, Pokerface, Chimp, Midas Mummy
Volatile (new)	Fire damage +15%. On KO it explodes: Ring-1, Power 60 Fire, friend and foe	Soaked halves its Fire damage and blocks its Burn. Electric ×1.25	Calaca Flamenca
Predatory (new)	+25% damage against targets below 50% HP	−15% damage against targets at full HP	Werewolf, Lab Assistant
Chronal (new)	Wins all Speed ties. Slow effects on it −50%	Shock and Frozen last +1 round. Haste on it −50%	Cog Cuckoo
Conductive (new)	Shock has no effect on it but still counts as "shocked". Its Electric attacks +15%	Electric ×1.25	Frankenstein

Mind (mental and social nature)

Characteristic	Buff	Weakness	Used by
Emotional	+10% damage if an ally was KO'd last round	Fear chance ×1.5, Psychic ×1.25	Arachnia, Nexus, Vile, Cruorina, Pumpkin, Steak, Ballerina, Piggybank, Scarecrow, Ghost Train, Siren, Wisp, Calaca, Baby Mummy, Leech Cook
Emotionless	Immune to Fear, Depressed and Spotlight. Psychic ×0.5	Cannot benefit from Morale effects (Empowered and Well Fed from allies or items). Marked lasts +1 round	Lullabun, Crystal Eye, Chimp, Frankenstein, Cog Cuckoo, Lab Assistant

Characteristic	Buff	Weakness	Used by
Hive Mind	+5% Accuracy and +5% PDef/SDef per adjacent friendly Hive Mind unit (max +15%)	When a Hive Mind ally is KO'd, all Hive Mind units are Dazed (−20 Speed, 1 round)	Mycel, Shrink Heads, Termite, Zombie Limb
Multi-Minded	Fear, Silence, Depressed and Spotlight last 1 round shorter	First action of each round: −10% Accuracy	Pokerface
Feral (new)	Below 50% HP: +15% damage and +10 Speed. Immune to Fear	Gear items work at 50% strength	Werewolf
Greedy (new)	+1 AP next round for each KO this unit makes	Enemy gets +3 VP when it is KO'd	Midas Mummy
Devoted (new)	+10% SDef per friendly unit within 2 tiles (max +20%)	No friend within 3 tiles: −10% Accuracy, Fear chance ×1.25	Mambo
Insatiable (new)	Heals 10% max HP whenever any unit is KO'd within 3 tiles	Loses 5% max HP at round end if no unit was KO'd that round (never below 1 HP)	Little Wendigo

Every characteristic is used by at least one character, so none are decoration. In your first document Ghost Train Employee, Pokerface and Frankenstein had a trait in the wrong slot ("Spectral" as material, "Multi-Minded" and "Synthetic" as biology). They are now sorted into the right category.

4. Status effects

Statuses describe what is happening to a unit right now, separate from what it is (characteristics) and from the tile it stands on (fields). Each status has a duration in rounds, a stack limit, a strength and a removal rule. Durations tick down in the end phase. Your 12 original statuses are first, followed by the ones your roster and the new characters need.

Core statuses

Status	Duration	Max stacks	Effect	Applied by
Poison	3	2	5% max HP per stack at round end	Arachnia, Vile, Toxic Field
Bleeding	3	2	4% max HP per field the unit moves, per stack. A second application doubles the bleed and resets the timer	Pokerface (Sad), Werewolf (Wolf form), Spike Pit; Cruorina bleeds herself
Burn (new)	3	2	4% max HP per stack at round end. Water Field or Soaked removes it	Calaca, Fire Field, Scalded Field, Stew, Flame Oil
Slow	2	1	Speed ×0.8	Midas Bandage Lash, Chrono Field, Bear Snare
Haste (new)	2	1	Speed ×1.25	Adrenaline Shot, items
Blind	2	1	−30 Accuracy	Will-o-Wisp, Swamp Siren
Shock	1	1	Each action of the unit has a 35% chance to be interrupted (AP lost)	Frankenstein, Cymbal Chimp, Electric Field
Corrosion	2	3	−15% PDef per stack. Robust units are immune	Termite acid
Fear	1	1	The unit cannot move closer to the source, and its attacks against the source get −20 Accuracy	Baby Mummy Wail
Marked	2	1	Attacks against it get +15 Accuracy and ignore Hidden and Fog	Ghost Train Glance, Alarm Bell
Vulnerable	2	1	+20% damage taken	Midas Mummy Curse
Silence	2	1	Cannot use Ability commands or Ability item cards	Gag Order trap

Status	Duration	Max stacks	Effect	Applied by
Infection	3	1	3% max HP per round. At round end it spreads with 25% chance to each adjacent unit (Viral carrier 40%)	Zombie Limb

Roster statuses

Status	Duration	Max stacks	Effect	Applied by
Corruption	Until cured	1	Current and max HP halved, damage +60%, Speed +40%. Ends if a teammate stops on the origin tile	Nexus tiles
Echo	2	1	The unit loses 3% max HP for every AP spent on its actions	Cymbal Chimp
Spotlight	Rest of round	1	+25% damage taken	Pokerface (Happy)
Depressed	Rest of round	1	−25% damage dealt	Pokerface (Sad)
Egg	3 rounds, then hatches	1	Hatching deals 10% max HP to the host and spawns a Mini Arachnia	Arachnia
Leeched	3	1	Drains 4% max HP at round end. Every 20 HP drained adds 1 Broth to the Pot	Leech Cook
Patient	2	1	The unit takes ×1.35 from the Lab Assistant's Scalpel	Lab Assistant
Jinx (new)	2	1	−10 Accuracy and −10% damage dealt	Baby Mummy death

Status	Duration	Max stacks	Effect	Applied by
Gilded	Rest of match	1	Speed −35%, Max Move −1, PDef and SDef +40%, damage +30%, regenerates 5% max HP per round, immune to Poison, Bleeding, Burn and Corrosion. If it is KO'd the enemy gets +5 VP and +3 AP	Midas Touch card
Garland	3	1	If KO'd, it returns next round on the same tile with 30% max HP (once)	Calaca Flamenca
Starving Mark	2	1	Each time a friendly non-Wendigo unit damages the marked unit, your team banks +1 Feast AP (max +2 per round, paid next round)	Little Wendigo
Snared	1	1	The unit may move only 1 more tile this round	Snare Field, Bear Snare
Dazed	1	1	Speed −20	Hive Mind weakness
Mired	1	1	Speed −15	Swamp tiles
Soaked	1, refreshes while on Water	1	Electric ×1.25, Fire ×0.75, removes Burn	Water Field, Rain Barrel
Frozen	1	1	Cannot move. Fire damage ×1.25	Frozen Water, Frost Mine, Ice items
Well Fed	2	1	+10% damage	Leech Cook Stew
Exhausted (new)	1	1	Speed −15%	Werewolf after Wolf form

Generic buffs and debuffs (used by items)

Status	Duration	Effect
Empowered	2	+25% damage dealt
Weakened	2	−20% damage dealt
Fortified	2	PDef and SDef +20%
Brittle	2	PDef and SDef −20%. Robust units are immune
Regeneration	3	Heals 5% max HP at the start of each round
Shield	Until end of next round	Absorbs a fixed amount of damage before HP. The highest shield counts, shields do not add up
Hidden	Until revealed	Not shown to the enemy. Revealed when damaged, when attacking, after 2 rounds, or after moving more than 2 fields in one round. Perceptive units within 3 tiles and Marked targets still see or hit it
Entranced	While the Voodoo copy lives	Mambo cannot move, attack or use abilities

Timing and removal

- **End-phase tick order:** Burn → Poison → Infection spread → Leeched → Echo → Regeneration → durations go down by 1.
- **Antidote** removes Poison, Infection, Egg and Leeched. **Smelling Salts** removes Shock, Fear, Blind, Slow, Dazed, Silence and Jinx. **Sterile Fields** remove Poison, Infection, Egg and Leeched at round end.
- Corruption, Gilded, Garland and Hidden are not removed by cleanses.
- Stacking: re-applying a status refreshes its duration and adds a stack up to the limit. Strength never stacks past the limit.
- Immunities come from characteristics (section 3). Each status says in its table row which characteristic makes it weaker or immune.

5. Fields and terrain

A tile can hold up to 2 fields at once. A third replaces the oldest. When a new field lands on an existing one, the combination table below is checked first. Fields act in the end phase unless a row says otherwise. Fields created by cards and attacks last 3 rounds unless stated. Your 15 original fields are all defined, plus 8 new ones (marked new) and the fields your characters create.

Terrain and objectives (placed by the map)

Field	Effect
Normal	None
Wall-Obstacle	HP 120, PDef 60, SDef 60. Blocks movement and Line of Sight. When destroyed it becomes an Acid Field
Water	Units on it are Soaked. Amphibious units move through it for free. Permanent
Overgrowth	Photosynthetic units heal +8% instead of +5%. Other Grounded units pay +1 AP to enter. Fire here lasts +1 round and spreads. Permanent until burned
Ice	Entering costs +1 AP. A unit ending its move here gets Slow for 1 round. Fire turns it into Water
Control Field	+3 VP per round while you hold it (section 1)
Research Terminal	Adjacent unit pays 1 AP to hack: +5 VP (once every 2 rounds per terminal)
Lab Objective	Hold for 3 rounds in a row: +15 VP once

Hazard fields (cards, attacks, map events)

Field	End-of-round effect on units standing on it	Duration
Fire	Burn (1 stack), 100% chance. Ignites Gas. Leaves an Ash Field	2
Toxic	Poison (1 stack)	3
Electric	5% max HP Electric damage and 50% Shock. Counts for Frankenstein's Charge	3

Field	End-of-round effect on units standing on it	Duration
Acid	4% max HP Acid damage and 1 stack of Corrosion	3
Radiation	5% max HP Radiant damage. Switches off Regenerative	3
Sterile	Removes Poison, Infection, Egg, Leeched. No Toxic or Contamination can be created here. Toxic and Cursed units lose 5% max HP	3
Resonance	Sonic damage dealt or taken here +30%. Shock lasts +1 round. Phasing units become solid	2
Darkness	−15 Accuracy for units without Perceptive that attack from, into or through it. Photosynthetic units do not heal. Hidden units stay hidden while inside	3
Contamination	Status chances against units here +25% and status durations +1. Infection spreads here with 50%	3
Fog (new)	Blocks Line of Sight for Character-Target attacks through it (adjacent targets excepted). −15 Accuracy. Perceptive units ignore it	2
Ash (new)	Fire Fields cannot be created and Overgrowth cannot grow here. Dead and Bone units heal 4% max HP	3
Moonlit (new)	Mythic and Feral units may use Moon Pull for free. Predatory units +10% damage. Hidden units are visible. On every 5th round (Full Moon) all tiles count as Moonlit	3

Fields created by characters

Field	Effect	Duration	Created by
Corrupted Tile	Hidden from the enemy. The first unit to stop or deploy on it is Corrupted. Revealed when used	While Nexus lives	Nexus

Field	Effect	Duration	Created by
Swamp	Non-Amphibious units pay +1 AP to enter and get Mired. Amphibious units heal 5%. Spreads (see Siren)	Permanent	Swamp Siren, Mud Decoy
Gas Field	Harmless alone. Explodes (Ring-1, Power 80 Fire) when Fire or Electric crosses it, or when the Wisp attacks it again	3	Will-o-Wisp, Gas Leak trap
Crystal Bomb Tile	Detonates when an enemy enters it: Star-2, Power 70 Radiant	Until triggered	Crystal Eye
Portal	Electric Field. A friendly unit on it may pay 1 AP to appear on a free tile next to Crystal Eye	3	Crystal Eye
Acid Field	Corrosion for units crossing it	3	Termite Mound, destroyed walls
Ant Trail	An enemy crossing or ending on a trail tile takes Power 25 once per round	3	Termite Mound
Snare Field (new)	Snared: the unit may only move 1 more tile this round	3	Scarecrow
Chrono Field (new)	Units ending the round here get Slow. Haste on them is removed	1	Cog Cuckoo
Marigold Field (new)	Dead, Bone and Spectral units heal 6% max HP, Living units 3%. Calaca gains a Soul whenever a unit is KO'd on it	2	Calaca Flamenca
Bandage Field (new)	Enemies pay +1 AP to enter. Friendly Cloth, Cursed and Dead units heal 8% max HP	2	Baby Mummy
Scalded Field (new)	5% max HP Fire damage and 50% Burn	2	Leech Cook (spilled pot)

Field combinations

Existing + new	Result
Water + Electric	**Electrified Water:** Electric effects spread over all connected Water tiles. Soaked units take Electric ×1.25
Water + Toxic	**Contaminated Water:** Toxic spreads over connected Water tiles. Units get Poison and Soaked
Fire + Water	**Steam:** Fog plus 3% max HP Fire damage for 2 rounds. Both fields are consumed
Fire + Toxic	**Toxic Smoke:** Fog, Poison and Blind (50%) for 2 rounds
Ice + Water	**Frozen Water:** the first unit to enter becomes Frozen for 1 round. Then it turns into Ice
Fire + Ice	The Ice melts into Water
Fire + Overgrowth	**Wildfire:** spreads 1 tile per round for 3 rounds, Burn 100%
Fire + Swamp	**Swamp Gas:** the tile becomes a Gas Field and the swamp dries out
Fire or Electric + Gas	**Explosion:** Ring-1, Power 80 Fire. The gas is consumed
Acid + Water	**Diluted Acid:** half strength, spreads over connected Water
Electric + Resonance	**Shock Storm:** Shock 100% and 5% max HP Electric damage
Sterile + Toxic, Contamination or Infection	**Suppressed:** Sterile wins and removes the other field
Fire + Marigold	The Marigold burns away. Calaca gains 1 Soul. Burn applies to units on it
Radiation + Overgrowth	**Mutation:** Overgrowth heals Photosynthetic units 12% but also grows 1 tile per round

6. Decks, hand and progression

A player brings a Character Deck of 10 characters and an Item Deck of 20 cards. Five characters can stand on the board at once, and the game offers 4 of your undeployed characters each round.

Character Deck rules (10 cards)

Rule	Value
Deck size	Exactly 10 characters
Copies	1 per character. Zombie Limb and Baby Mummy may be taken up to 3 times each
Rarity limits	At most 2 Legendary, and at most 4 Epic and Legendary together
Deploy budget	Total Deploy AP of the deck is at most 58 (typical decks land at 42–50)
On the board	At most 5 characters at once, summons excluded
Offered each round	4 random undeployed characters. Lock any of them to keep them
Re-roll	1 AP per card, 3 AP for all unlocked cards. Locked cards are never re-rolled
Tuning	8 Tune Steps per character, set in the deck builder (section 2)

Item Deck rules (20 cards)

Rule	Value
Deck size	Exactly 20 cards
Copies by rarity	Common 3, Uncommon 2, Rare 2, Epic 1, Legendary 1
Rarity limit	At most 3 Epic and Legendary cards together
Start	Shuffled. You begin with 3 cards in hand and draw 1 each round
Hand limit	6 cards. Extra cards are discarded in the end phase

Rule	Value
Per round	Play 0–3 cards, of which at most 2 are Free cards
Information	The enemy sees your hand size, never its content, until a Scout card reveals a card

Full item rules are in section 8.

Rarity and drops

Rarity	Drop share	Characters	Item cards
Common	45%	4	21
Uncommon	28%	7	18
Rare	16%	10	18
Epic	8%	6	8
Legendary	3%	3	5

Rarity changes how often a card drops and how many you may play. It does not change base power. Duplicates drop about 4 times as often as cards you do not own, and every duplicate helps upgrade a card by +10% HP and damage (formula in section 2). Friendly matches always run at Level 10.

Progression

- **Opponents:** bots that choose smart moves and learn from matches, friends (round timer adjustable from 15 to 90 s, default 30 s), and Bosses with buffed stats, strong teams and strong AI.
- **Match rewards:** a win gives 25 trophies plus 1 per 5 VP of winning margin. A loss costs 15 trophies, never below 0. You also receive gold, duplicates and chests after every match, plus daily missions such as "play 3 matches" and "win 1".
- **Milestones:** reaching a trophy milestone opens a new area. Its cards become available to buy or draw.

Milestone area	Cards that unlock
Laboratory	Nexus, Backstabber Lab Assistant, Frankenstein, Crystal Eye

Milestone area	Cards that unlock
Graveyard	Vile, Zombie Limb, Calaca Flamenca, Rotten Flesh Steak, Mambo
Bog	Arachnia, Swamp Siren, Mycel, Termite Mound, Gas Will-o-Wisp, Leech Cook
Toy Room	Lullabun, Pokerface, Piggybank, Cymbal Chimp, Ballerina, Cog Cuckoo
Haunted Forest	Moonbound Werewolf, Little Wendigo, Scarecrow, Pumpkin, Ghost Train Employee
Tomb	Midas Mummy, Baby Mummy, Shrink Heads, Cruorina

Each area also unlocks item cards that fit its theme (traps and Gear in the Graveyard, Field cards in the Bog, and so on).

Three example decks

Deck	Ten characters	Deploy AP	Plan
Plague Garden	Arachnia, Vile, Mycel, Swamp Siren, Leech Cook, Termite Mound, Pumpkin, Lab Assistant, Zombie Limb ×2	42	Poison and status attrition. Mycel and Vile punish statuses, Zombie Limbs are cheap blockers
Tomb and Ember	Calaca Flamenca, Midas Mummy, Baby Mummy ×2, Little Wendigo, Werewolf, Mambo, Will-o-Wisp, Rotten Flesh Steak, Cog Cuckoo	45	Fire, souls and curses. Wisp gas plus Calaca's fire, Midas buffs a tank, Baby Mummies feed the Wendigo
Clockwork Circuit	Nexus, Frankenstein, Crystal Eye, Scarecrow, Ghost Train Employee, Lullabun, Cymbal Chimp, Piggybank, Ballerina, Pokerface	49	Information and tempo. Scarecrow and Ghost Train read and move the enemy, Nexus corrupts the middle

7. Character roster (30 characters)

The roster has 30 characters: your 20 originals with numbers added, plus 10 new ones built from your notes. Each has one characteristic per category, exact stats, attacks with numbers and one ability. New characters fill gaps the old roster had: cheap Swarm units, a second healer type, true tanks, one-time tricks and information denial.

How to read the tables

- **Tier** sets the KO reward (section 1): Swarm +4, Standard +10, Elite +12.
- **Move** is Max Move in fields. **AP/f** is AP per field (your Activity Cost Multiplier), rounded up per Move command.
- **Attack lines:** category / tag, Power, Range, AP cost, Accuracy (— = cannot miss), Crit chance, maximum uses per round. Priority is only listed if it is not 0.
- "Status" chances use the numbers in section 4. A `Field-Target` attack is aimed at a tile, a `Character-Target` attack follows its unit.

Master stat table

#	Character	Rarity	Tier	Deploy AP	HP	PAtk	PDef	SAtk	SDef	Speed	Move	AP/f
1	Arachnia	Rare	Standard	6	520	85	95	60	70	65	4	1
2	Nexus	Epic	Standard	6	260	40	50	95	60	160	5	1
3	Vile	Rare	Standard	5	340	100	55	90	75	40	3	1
4	Cruorina	Legendary	Elite	8	300	50	40	105	70	110	5	1
5	Mycel	Rare	Standard	5	300	40	60	80	90	75	3	1
6	Lullabun	Rare	Standard	4	250	95	45	40	55	120	5	0.75
7	Trick or Trade Pumpkin	Uncommon	Standard	4	320	70	70	75	60	70	0	—
8	Rotten Flesh Steak	Uncommon	Standard	5	560	85	80	40	55	60	3	1.25
9	Rusted Ballerina	Rare	Standard	5	280	100	60	45	50	135	5	0.75
10	Piggybank	Common	Standard	3	280	50	80	70	80	80	3	1
11	Scarecrow	Common	Standard	4	340	75	70	55	65	70	3	1
12	Frankenstein	Epic	Elite	7	420	85	65	80	50	85	3	1
13	Ghost Train Employee	Rare	Standard	4	240	45	40	85	80	105	4	1
14	Pokerface	Epic	Standard	5	330	70	70	70	70	95	4	1
15	Shrink Heads (Master)	Uncommon	Standard	5	260	60	50	70	55	100	3	1
16	Swamp Siren	Rare	Standard	5	290	50	55	90	75	90	4	1
17	Gas Will-o-Wisp	Rare	Standard	5	230	30	35	95	70	115	5	1
18	Crystal Eye	Epic	Elite	7	270	40	70	100	85	85	4	1

#	Character	Rarity	Tier	Deploy AP	HP	PAtk	PDef	SAtk	SDef	Speed	Move	AP/f
19	Termite Mound	Uncommon	Standard	5	400	60	75	70	55	50	0	—
20	Cymbal Chimp	Uncommon	Standard	4	380	80	70	45	60	80	3	1
21	Mambo, Voodoo Witch	Legendary	Elite	7	270	40	50	95	85	85	3	1
22	Calaca Flamenca	Epic	Elite	7	290	60	55	100	65	120	5	1
23	Moonbound Werewolf (Human)	Epic	Standard	6	420	70	85	40	55	85	3	1.25
24	Midas Mummy	Legendary	Standard	6	380	75	90	55	80	60	3	1.25
25	Cog Cuckoo	Rare	Standard	5	300	55	70	80	75	90	3	1
26	Zombie Limb	Common	Swarm	1	90	40	30	20	30	90	4	0.5
27	Baby Mummy	Common	Swarm	1	110	30	35	25	40	70	3	0.75
28	Little Wendigo	Uncommon	Swarm	2	120	35	35	50	50	105	4	0.75
29	Backstabber Lab Assistant	Rare	Standard	5	250	95	45	70	55	125	5	0.75
30	Leech Cook	Uncommon	Standard	5	330	60	65	85	70	75	3	1

Your example numbers are kept: Nexus Speed 160, Cruorina Speed 110 and Deploy 8, Arachnia Speed 65 and Move 4, Vile Speed 40.

Summons and objects

Summon	Made by	HP	PDef / SDef	Notes
Shrink Head (×4)	Shrink Heads	60	25 / 25	Nibble: Power 25, Range 1, 1 AP. Moves for free
Mini Arachnia	Arachnia's egg	260	95 / 70	PAtk 43, SAtk 30, Speed 78, no ability, no Lay Eggs
Candle	Will-o-Wisp	60	20 / 20	Heals the Wisp each round
Mud Decoy	Swamp Siren	80	40 / 40	Bursts when destroyed
Voodoo copy	Mambo	Half of the copied unit	As copied	Controlled by you at Mambo's Speed
Cooking Pot	Leech Cook	150	60 / 60	An object, not a unit. Stores Broth

Summons never give VP or AP and never count toward the 5-character board limit.

8. Item rules

Items are secret cards you play during planning. They come in seven types, which cover every way you described using them: on a character, on a field, on an ability, on an attack, given to a character, plus hidden traps and information cards. There are 10 items per type, 70 in total (section 9).

The seven types

Type	Target	When it resolves	Rules
Character	One unit anywhere on the board, friend or enemy unless the card says otherwise	Priority +3	Instant effect
Field	A tile within 6 of any of your units, or any tile of your zone	Priority +3	Creates or changes fields. Uses the combination table in section 5
Ability	One planned Ability command	With that ability	If the command fizzles, the card returns to your hand

Type	Target	When it resolves	Rules
Attack	One planned Attack command	With that attack	If the attack fizzles, the card returns to your hand. The attack's use limit is unchanged
Gear	One unit	Priority +3	One Gear per unit. A new Gear replaces the old one, which is discarded. Gear is visible to both players and is lost when the unit is KO'd
Trap	A hidden tile in your zone or next to one of your units	Placed at Priority +3, face down	At most 3 Traps on the board, each lasts 6 rounds. It triggers when an enemy unit enters the tile (passing counts, and that unit's current Move command ends there). Perceptive units within 3 tiles, Night Goggles and Spy Drone reveal Traps. A Field attack on the tile destroys the Trap without effect
Intel	None	Priority +3	Cards, AP, information and round rules

Costs and limits

- **AP cards** cost 1–4 AP. **Free cards** cost 0 AP but have a requirement printed on the card. There are 8 Free cards in the catalog.
- Each round you may play 0–3 cards, and at most 2 of them may be Free.
- The same card name can be played once per round.
- Items do not scale with card Level, and any card may target any unit (friendly fire and healing the enemy are allowed) unless it says otherwise.
- Rarity counts across the 70 items: Common 21, Uncommon 18, Rare 18, Epic 8, Legendary 5.

Item characteristics

Every item carries one characteristic from section 3, shown in its Trait column.

- **Affinity:** if the unit the item affects (target, wearer, or the unit that triggers a Trap) has the same characteristic, the item's numbers (percentages, flat amounts, shields, heals) are +25%. AP costs and chances are not changed. Intel cards have no Affinity.
- **Trait Swap Gear:** three Gear cards (Prism Visor, Ghost Shroud, Wolf Pelt) replace the wearer's characteristic of the same category while worn. Both the buff and the weakness of the new characteristic apply. Removing the Gear restores the original.

Hand and information

- You start with 3 cards, draw 1 per round, and may hold 6. The enemy sees your hand size but not the cards.
- **Scout Card** reveals one unknown enemy card, which stays known until played. **Spy Drone** reveals Hidden units and Traps.
- **Midas Mummy** can lock a whole item Type for the rest of the match (section 7). Tarnished cards still sit in your hand but cannot be played.
- In the planning phase a card is part of the plan: you place it together with the commands it affects, and it resolves in the same Priority and Speed order as everything else.

9. The 70 items

Ten items per type, each with a rarity, a cost, a characteristic (Trait) and exact numbers. No item decides a match alone: the strongest ones are Legendary, cost 3–4 AP, and are limited to one copy per deck. Every field, status and characteristic from sections 3–5 appears on at least one item or character.

Character items (CH)

#	Item	Rarity	Cost	Trait	Effect
CH1	Field Medkit	Common	2 AP	Organic	Heals 25% max HP
CH2	Antidote	Common	Free (req: target has Poison, Infection, Egg or Leeched)	Living	Removes Poison, Infection, Egg and Leeched. The target is immune to them for 1 round
CH3	Adrenaline Shot	Common	1 AP	Living	Haste for 2 rounds and +1 Max Move this round. The target loses 5% max HP
CH4	Iron Tonic	Uncommon	2 AP	Steel	Fortified for 2 rounds and a Shield of 40 until the end of next round

#	Item	Rarity	Cost	Trait	Effect
CH5	Rage Pill	Uncommon	1 AP	Feral	Empowered for 2 rounds, but −10 Accuracy for 2 rounds
CH6	Smelling Salts	Uncommon	1 AP	Organic	Removes Shock, Fear, Blind, Slow, Dazed, Silence and Jinx
CH7	Blood Pact	Rare	Free (req: the target loses 15% of its current HP)	Parasitic	The target's next attack costs 1 AP less (minimum 1) and deals +20% damage
CH8	Mirror Charm	Rare	Free (req: discard another card)	Crystal	For 2 rounds the next Special hit on the target is reduced by 40%, and the attacker takes that same amount
CH9	Second Wind	Epic	4 AP	Regenerative	Heals 35% max HP and grants Regeneration for 3 rounds (5% per round). Removes all negative statuses except Corruption
CH10	Phoenix Feather	Legendary	4 AP	Volatile	For 3 rounds: if the target is KO'd, it returns at the start of the next round on the same tile with 40% max HP, once. The enemy keeps the KO reward. Not on Bosses

Field items (FD)

#	Item	Rarity	Cost	Trait	Effect
FD1	Contamination Burst	Common	2 AP	Toxic	Target tile becomes a Toxic Field for 3 rounds. Ring-1 around it becomes a Contamination Field for 2 rounds
FD2	Rain Barrel	Common	2 AP	Liquid	Water Field on 3 connected tiles for 3 rounds. Fire Fields on them are removed
FD3	Smoke Candle	Common	1 AP	Gas	Fog on Burst-1 (7 tiles) for 2 rounds
FD4	Molotov	Uncommon	2 AP	Volatile	Fire Field on the target tile for 2 rounds. Units in Ring-1 get Burn with 50% chance

#	Item	Rarity	Cost	Trait	Effect
FD5	Emergency Sterilization	Uncommon	2 AP	Synthetic	Burst-2: removes Poison, Infection, Egg, Leeched, and all Toxic and Contamination Fields in the area. The centre tile becomes a Sterile Field for 2 rounds
FD6	Tesla Coil	Rare	3 AP	Steel	Electric Field on 3 tiles in a straight line for 3 rounds
FD7	Seed Bomb	Rare	2 AP	Photosynthetic	Overgrowth on Burst-1 (7 tiles)
FD8	Tuning Fork	Rare	2 AP	Crystal	Resonance Field on Burst-1 for 2 rounds
FD9	Blackout Lantern	Epic	3 AP	Ether	Darkness on Burst-2 (19 tiles) for 3 rounds. Your Hidden units inside stay Hidden
FD10	Moon Charm	Legendary	4 AP	Mythic	Moonlit Field on Burst-2 for 3 rounds

Ability items (AB)

#	Item	Rarity	Cost	Trait	Effect
AB1	Amplifier Coil	Common	1 AP	Conductive	The ability's Range +1 and its area radius +1
AB2	Spare Battery	Common	1 AP	Steel	Refunds 1 AP after the ability resolves
AB3	Vocal Tonic	Common	1 AP	Organic	Removes Silence from the user and makes it immune this round
AB4	Quick Fuse	Uncommon	Free (req: the ability costs 2 AP or more)	Volatile	The ability costs 1 AP less and gets Priority +1
AB5	Mind Link	Uncommon	2 AP	Hive Mind	The ability's beneficial effects also apply at 50% to one friendly unit within 3 tiles of the user
AB6	Hex Scroll	Rare	2 AP	Cursed	Status effects created by the ability last 1 round longer and their chance is +25%
AB7	Skeleton Key	Rare	2 AP	Steel	The ability ignores Line of Sight, walls, Hidden and Fog
AB8	Overcharge Valve	Epic	2 AP	Volatile	The ability's numbers (damage, healing, Power) are +30%, and the user takes 8% max HP

#	Item	Rarity	Cost	Trait	Effect
AB9	Echo Crystal	Epic	3 AP	Crystal	The ability triggers twice, the second time at 50% strength. Not usable on once-per-game abilities
AB10	Time Dilation Bottle	Legendary	4 AP	Chronal	Restores one used once-per-game ability of a friendly unit (not Midas Touch)

10. Balance notes, synergies and open questions

The 10 new characters fill the gaps in the old roster, reuse no attack pattern without a twist, and connect to your existing characters through shared fields, statuses and characteristics. Numbers are a first pass and should be tested in bot matches before they are fixed.

Role coverage

Role	Old roster	New characters	What the new ones add
Tank	Arachnia, Rotten Flesh Steak, Termite Mound	Moonbound Werewolf, Midas Mummy	A mobile tank that grows stronger, and a slow golden tank that can be given to any ally
Healing and support	Mycel (one linked unit)	Mambo, Leech Cook, Lab Assistant, Calaca (Garland)	Four different styles: damage-to-heal link, stored broth, healing the enemy to set up a stab, revive
Cheap Swarm	None (cheapest Deploy was 3)	Zombie Limb, Baby Mummy, Little Wendigo	Deploy 1–2 units with their own small KO rewards, so spamming them is not free points
Burst	Ballerina, Lullabun	Lab Assistant, Cog Cuckoo	Backstab rewards the Rest command, the clock pattern can be predicted and dodged
Zoning and fields	Vile, Termite, Wisp, Crystal Eye, Siren	Calaca, Cog Cuckoo, Leech Cook	Marigold, Chrono and Scalded fields

Role	Old roster	New characters	What the new ones add
Information	Scarecrow, Ghost Train, Lullabun	Lab Assistant	The first counter to information: her plans cannot be revealed
AP economy	Piggybank, Pumpkin	Little Wendigo, Midas Mummy	Feast AP and Famine Aura, and Greedy items

Overlap check: no near-duplicate attacks

- **Single-target ranged shots** are Nexus Long Shot (Range 7, Electric, sets up Overclock), Mambo Hex Dart (Soul, sets up Spirit Link), Piggybank Penny Shot (scales with Coins) and Calaca Flaming Skull (stops at the first unit, splashes, burns). Each has a different range band, tag and rider.
- **Cones:** Mycel Sporecloud punishes statuses, Siren Mire Song blinds only on Swamp.
- **Piercing lines:** Cruorina's Lance is one straight line, Crystal Eye's Beam bends once and is slower.
- **Rings around the user:** Cruorina costs her HP, Ballerina scales crit with movement, Chimp only fires after Rest, Baby Mummy only hits enemies and causes Fear.
- **Field explosions:** Pumpkin hits 3 scattered tiles, Frankenstein exploits Shock, Wisp needs a gas setup, Cog Cuckoo uses a clock pattern that depends on the round, Vile chains a teleport on a kill.
- **Repositioning** is split into six non-overlapping jobs: Pumpkin and Ballerina move themselves, Lullabun swaps with the target, Ghost Train moves others by a vector, Shrink Heads and Termite swap with allies, Wisp teleports to its Candle.
- **Bleeding** comes from only three sources (Pokerface Sad, Werewolf Wolf form, Patchwork Zombie Rend) plus Cruorina's self-bleed and the Spike Pit trap.

Synergies between new and old characters

Pair	Why it works
Calaca Flamenca + Gas Will-o-Wisp	Flaming Skull has the Fire tag, so it detonates the Wisp's gas, and the kills that follow feed Calaca's Souls
Midas Mummy + Baby Mummy	A Gilded Baby Mummy is a 1-AP tank. Its Little Curse punishes anyone who kills it, and both are Cloth and Cursed

Pair	Why it works
Little Wendigo + Piggybank	Feast AP and Coins both reward hitting and saving. Famine Aura makes the enemy's AP tight, so Idle Bonus decisions matter more
Lab Assistant + Ghost Train Employee	Mind's Eye lets Ghost Train hold a speed tie, Trainticket moves a target, and the Lab Assistant stabs once the target has finished acting
Leech Cook + Mycel + Arachnia	Leeched and Poison are statuses, so Sporecloud deals +50%. Broth heals the tanks that hold the line
Cog Cuckoo + Ghost Train Employee	Trainticket can move an enemy onto the hour-hand tile that was announced by the round number
Zombie Limbs + Termite Mound + Shrink Heads	Hive Mind neighbours give +5% each. Burrowing walks through the walls the Mound destroys. Hive Shift swaps with Organic Zombies
Mambo + Mycel	Mycel's Symbiosis partner takes less damage, and Spirit Link on that partner heals its neighbours
Moonbound Werewolf + Scarecrow	Harvest Hook pulls an enemy into the Werewolf's charge line. Full Moon rounds (every 5th) give a free transformation
Calaca Flamenca + Vile	Vile's kills feed Souls, and a Garland on Vile makes Rot Siphon very hard to remove

Balance levers

If a character over-performs in testing, change the first lever below before touching anything else.

Risk	Where	First lever
KO AP reward snowballs a lead	Section 1	Reduce Standard KO AP from +10 to +8. The 30 AP cap already limits the worst case

Risk	Where	First lever
Revive loops	Garland, Phoenix Feather	Garland costs 4 Souls instead of 3, or revives with 20% HP
Gilded is too strong	Midas Touch	Raise the enemy bounty from +5 VP to +8 VP
Three-Limb Brute is cheap	Zombie Limb	Brute HP 480 → 420
Copying strong units	Voodoo Doll	Limit copies to Standard tier or lower, or raise the backlash to 30%
AP engines	Feast AP, Lucky Coin	Cap Feast AP at +1 per round
Rewind is too safe	Turn Back Time	Cost 2 AP → 3 AP

Open questions and assumptions

1. **Deck size:** I read "each deck should have 10 characters you can put on" as a 10-card deck with at most 5 on the board at once. If you meant 10 on the board, deploy costs and the AP curve need to change.
2. **Spirit Link:** I excluded the target from the healing and allowed targeting allies, so it works as a pain transfer. Tell me if the target should be healed too.
3. **Midas Touch:** I read "the type of card" as one of the 7 item Types. If you meant a single card name, the price of the ability would be far smaller.
4. **Blood Drain:** I used 15% of the dying enemy's max HP, not of Cruorina's own.
5. **KO AP:** kept at +10 as in your rules. Because AP is only 10–16 per round, this is the number I would test first.

Original roster, part 1 (characters 1–10)

1. Arachnia: tank and poison zoner

Rare · Standard · Deploy 6. Organic · Living · Grounded · Toxic · Emotional.

- **Poison Bite** — Physical / Pierce, Power 60, Range 1, 2 AP, Acc 95, Crit 5%, max 2. Poison 35%.
- **Lay Eggs** — Physical / Pierce, Power 30, Range 1, 3 AP, Acc 90, max 1. The target must be Living and receives an Egg (one Egg per Arachnia at a time). If Arachnia is still alive 3 rounds later, the egg hatches: the host takes 10% max HP and a Mini Arachnia appears

next to it on your side. If the Mini survives 3 more rounds it grows into a full Arachnia. Antidote and Sterile Fields remove the Egg. Limit: 2 hatched Arachnia per game, and they give no KO reward.

- **Ability — Ambush Venom:** if she has moved fewer than 2 fields this round, every enemy within 4 tiles that damages her is Poisoned with a chance of 100% ÷ (1 + fields moved so far this round). That is 100% standing still, 50% after 1 field.
- **Arachnophobia:** Emotional enemies attacking her from range 1–2 get −10 Accuracy.

2. Nexus: fast artillery and corrupter

Epic · Standard · Deploy 6. Synthetic · Artificial · Grounded · Viral · Emotional.

- **Long Shot** — Special / Electric, Power 55, Range 7 (High), 2 AP, Acc 85, Crit 8%, max 2.
- **Overclock** — Support, Range 6, 2 AP, max 1 per target. Choose a Corrupted friendly unit: its next damaging action deals ×1.5 damage (lasts 2 rounds).
- **Ability — Corrupt (On Deploy):** 3 random tiles outside the enemy deployment zone are Corrupted and hidden from the enemy. In the planning phase of the round you deploy him, you may re-roll all 3 tiles up to 3 times. A unit that stops on or deploys onto a Corrupted Tile gets Corruption (current and max HP halved, damage +60%, Speed +40%) and the tile is revealed. Each tile corrupts one unit. Corruption stays when the unit leaves. It ends when another unit of the same player stops on the tile and takes it over. If Nexus is KO'd, all Corrupted Tiles and all Corruption disappear. It does not stack with a second Nexus.

3. Vile: slow reaper and poison engine

Rare · Standard · Deploy 5. Organic · Dead · Grounded · Toxic · Emotional.

- **Reaper's Slash** — Physical / Slash, Power 70, Range 1, 2 AP, Acc 90, Crit 25%, max 2.
- **Miasma Rot** — Special / Toxic, Field-Target, Power 40, Range 4 (Mid), 3 AP, Acc —, max 1. Creates a Toxic Field on the tile for 2 rounds and hits the unit on it, which is Poisoned (100%). If a unit Poisoned by this attack dies, Vile teleports onto its tile and deals Power 35 Special / Toxic to every unit within 1 tile.
- **Ability — Rot Siphon:** Poison on Vile heals him 5% max HP per tick instead of damaging him, and each tick raises his max HP by +1% (up to +30% above base). A Toxic Field under him counts as one Poison tick.

4. Cruorina: blood ghost and area caster

Legendary · Elite · Deploy 8. Liquid · Spectral · Airborne · Regenerative · Emotional.

- **Crimson Lance** — Special / Pierce, Power 60, Range 4 (Mid), 2 AP, Acc 90, Crit 10%, max 2. Pierces: it hits every unit on the straight line up to its range.

- **Hemorrhage Burst** — Special / Toxic, Power 95, Ring-1 around her (friend and foe), 3 AP, Acc —, Crit 5%, max 1. Afterwards she bleeds for 3 rounds, losing 3% max HP for each field she moves.
- **Ability — Blood Drain:** when an enemy dies within 1 tile of her, she heals 15% of that unit's max HP.

5. Mycel: support and status punisher

Rare · Standard · Deploy 5. Organic · Living · Grounded · Parasitic · Hive Mind.

- **Sporecloud** — Special / Toxic, Cone-3, Power 40, 2 AP, Acc 90, Crit 5%, max 2. +50% damage (Power 60) against targets with any status effect.
- **Mind Root** — Support, Range 3, 3 AP, Acc —, max 1. Heals the Symbiosis unit for 20% max HP and removes 1 negative status.
- **Ability — Telepathic Symbiosis:** at the start of each round Mycel links to the friendly unit with the highest max HP within 3 tiles (ties: the one placed first). That unit takes 25% less damage and Mycel takes the removed 25% instead, ignoring her defenses. The link ends if Mycel is KO'd.

6. Lullabun: ambush assassin

Rare · Standard · Deploy 4. Cloth · Artificial · Grounded · Perceptive · Emotionless.

- **Stuffing Slash** — Physical / Slash, Power 55, Range 1, 2 AP, Acc 95, Crit 10%, max 2. Always crits if he was Hidden until now and this is his first attack.
- **Swap Places** — Physical / Blunt, Power 50, Range 4 (Mid), 3 AP, Acc 85, max 1. After the hit he swaps tiles with the target.
- **Ability — Peek-a-Boo:** when deployed he causes no pop-up and is Hidden. He stays Hidden until he takes damage, attacks, 2 rounds pass, or he moves more than 2 fields in one round. Field attacks can still hit his tile. Perceptive units within 3 tiles see him.

7. Trick or Trade Pumpkin: rooted bomber and economy bait

Uncommon · Standard · Deploy 4. Organic · Living · Rooted · Photosynthetic · Emotional.

- **Teleport Trick** — Physical / Blunt, Power 55, 3 AP, Acc 100, Crit 5%, max 1. Teleports up to 3 tiles to a free tile, then hits the enemy with the lowest current HP within 1 tile.
- **Candy Rain** — Physical / Blunt, Field-Target ×3, Power 65 each, Range 4 (Mid), 3 AP, Acc —, Crit 5%, Priority −1, max 1. Choose 3 tiles. At execution all of them explode.
- **Ability — Trade:** if it is KO'd after standing on the board for at least 2 rounds, its owner gets +2 AP and the enemy loses 2 AP in the next round.

8. Rotten Flesh Steak: tank that bites back

Uncommon · Standard · Deploy 5. Organic · Living · Grounded · Parasitic · Emotional.

- **Snap** — Physical / Pierce, Power 55, Range 1, 2 AP, Acc 95, Crit 5%, max 2. Parasitic: heals 15% of the damage dealt.
- **Order Up** — Physical / Blunt, Power 70, jump to a free tile within 3 (Low-Mid), hits Ring-1 around the landing tile, 3 AP, Acc —, Crit 5%, max 1. Enemies with max HP of 350 or less are pushed 1 tile away.
- **Ability — Fake Steak:** an attack made from 1–2 tiles away reflects recoil to the attacker: 30% of the damage taken at range 1, 20% at range 2 (max 60 per hit).

9. Rusted Ballerina: high-crit dancer

Rare · Standard · Deploy 5. Steel · Artificial · Grounded · Robust · Emotional.

- **Pirouette** — Physical / Slash, Ring-1 around her (friends too), Power 55, 2 AP, Acc —, max 2. Crit 5% plus 8% for each field moved this round (max 3 fields, so 29%).
- **Grand Jeté** — Physical / Slash, Power 95, 3 AP, Acc 85, Crit 10%, max 1. Teleports 1 tile, then strikes one target within 1 tile.
- **Ability — Encore:** if a Character-Target attack aimed at her misses because she moved out of range, or a field attack lands on a tile next to hers instead of hers, she gains 1 Token (max 2). The next time she deals damage, that attack hits again once per Token, each extra hit for 25% of the original damage.

10. Piggybank: economy support

Common · Standard · Deploy 3. Synthetic · Living · Grounded · Robust · Emotional.

- **Penny Shot** — Physical / Pierce, Power 50 +10% per Coin (max 6 Coins, so Power 80), Range 5 (Mid-High), 2 AP, Acc 90, Crit 5%, max 2.
- **Shake Down** — self, 1 AP, max 2. Loses 10% max HP and gains 2 Coins.
- **Ability — Savings:** if you spent less than 50% of the round's AP, Piggybank gains 1 Coin at round end (max 6). Deploying a character onto a tile next to it lowers that character's Deploy AP by 1 for every 2 Coins (max −3), and those Coins are spent.

Original roster, part 2 (characters 11–20)

11. Scarecrow: information and control

Common · Standard · Deploy 4. Wood · Artificial · Grounded · Perceptive · Emotional.

- **Harvest Hook** — Physical / Slash, Power 50, Range 2, 2 AP, Acc 90, Crit 5%, max 2. Pulls the target 1 tile toward him.

- **Barbed Fence** — Field-Target ×2 (two adjacent tiles), Range 4 (Mid), 2 AP, Acc —, max 1, no damage. Creates Snare Fields for 3 rounds.
- **Ability — Watchful Eye:** each round choose 1 enemy character to watch. In the last 10 seconds of planning you see its full plan: moves, attacks, targets and their order. If it is Hidden you also see its tile. The Lab Assistant is immune.

12. Semi-Mechanical Frankenstein: electric bruiser

Epic · Elite · Deploy 7. Organic · Artificial · Grounded · Conductive · Emotionless.

- **Galvanic Fist** — Physical / Electric, Power 55, Range 1, 2 AP, Acc 95, Crit 5%, max 2. Shock 30%. If she stands on an Electric Field, the hit also arcs to the nearest other enemy within 2 tiles for 50% damage.
- **Skybolt** — Special / Electric, Field-Target from above, Power 80, Range 4 (Mid), 3 AP, Acc —, Crit 5%, max 1, ignores LOS. +30% damage against a Shocked target. If it hits a teammate, the damage still applies and that teammate immediately executes its next queued attack out of order.
- **Ability — Static Charge:** she gains 1 Charge when she ends a round on an Electric Field, is Shocked, or is hit by an Electric attack (max 1 Charge per source per round). At 3 Charges her next attack gets +1 Range and +60% damage, then her Charges reset to 0.

13. Ghost Train Employee: seer and tempo mover

Rare · Standard · Deploy 4. Ether · Living · Airborne · Perceptive · Emotional.

- **Seer's Glance** — Special / Psychic, Power 50, Range 3, 2 AP, Acc 95, Crit 5%, max 2. Marks the target (2 rounds) if it has a Move command planned this round.
- **Trainticket** — Utility, Range 3, 3 AP, Acc —, max 1. Choose a unit and a vector (a direction and a distance up to 3). When executed, that unit moves by the vector from wherever it stands at that moment, ignoring units and obstacles in between. It fails if the destination tile cannot be entered. It also works on allies.
- **Ability — Mind's Eye:** in planning you may shift her Speed by −15% to +15% (whole numbers). In a Speed tie with a friendly character you choose after which action of that character she acts, so Trainticket can land at the right moment.

14. Pokerface: one body, three moods

Epic · Standard · Deploy 5. Synthetic · Artificial · Grounded · Robust · Multi-Minded.

- **Ability — Mood:** in the planning phase of the round he is deployed you choose Happy, Sad or Angry. It cannot change later. The enemy learns it when he first attacks.
- **Happy.** *Spotlight* (2 AP, Range 4, Acc 95, max 2): the target takes +25% damage for the rest of the round. *Replay* (3 AP, Range 4, Acc 90, max 1): the target repeats its last attack at 50% damage with the same target or vector, right after this action and at no

AP cost for them.

- **Sad.** *Dirge* (2 AP, Range 4, Acc 95, max 2): the target deals −25% damage for the rest of the round. *Weeping Wound* (Special / Soul, Power 35, Range 3, 3 AP, Acc 90, max 1): Bleeding for 3 rounds. Hitting an already bleeding target doubles the bleed and resets the timer.
- **Angry.** *Slap* (Physical / Blunt, Power 60, Range 1, 2 AP, Acc 95, Crit 5%, max 2): pushes the target 1 tile. *Box Leap* (Physical / Blunt, 4 AP, Acc —, max 1): choose tile A within 3 and tile B exactly 3 tiles from A. He jumps to A and deals Power 45 to Ring-1 and Power 85 to the unit on A, then does the same at B and ends there.

15. Shrink Heads: a master and four heads

Uncommon · Standard · Deploy 5. Organic · Colony · Grounded · Viral · Hive Mind.

- **Setup:** the Master and 4 Shrink Heads deploy together. The heads appear on the Master's upper-left, upper-right, lower-left and lower-right neighbour tiles. Heads count as units but do not block tiles, so other characters can stand on them. They move separately for free, 5 tiles in total per round shared between all heads. A head only has Nibble (Power 25, Range 1, 1 AP, Acc 90). If the Master is KO'd, all heads vanish.
- **Shrunken Strike** (Master) — Physical / Blunt, Power 45 +15% per Shrink Head next to the Master or the target (max +60%), Range 1, 2 AP, Acc 95, Crit 5%, max 2.
- **Head Swap** (Master) — Physical / Blunt, Power 55, 2 AP, Acc —, max 1. Swaps tiles with any Shrink Head within 6 tiles, then damages Ring-1 around his new tile.
- **Ability — Head Count:** each adjacent Shrink Head counts as a friendly Hive Mind neighbour for the Master's Hive Mind bonus (max +15%).

16. Swamp Siren: terrain healer and controller

Rare · Standard · Deploy 5. Organic · Living · Amphibious · Regenerative · Emotional.

- **Mire Song** — Special / Sonic, Cone-3, Power 50, 2 AP, Acc 90, Crit 5%, max 2. Targets standing on a Swamp tile are Blinded for 2 rounds (100%).
- **Mud Double** — 2 AP, Acc —, max 1. She moves 1 tile for free and leaves a Mud Decoy on her old tile. When the decoy is destroyed, or after 3 rounds, it bursts for Power 55 Physical / Blunt on Ring-1. At the end of every round the decoy turns its own tile into Swamp, then one random connected tile.
- **Ability — Swamp Heart (On Deploy):** choose a tile within 4. It and 2 random connected tiles become Swamp. She heals 5% max HP at round end while standing on Swamp, and if she ends a round on Swamp, one random neighbour tile also becomes Swamp.

17. Gas Will-o-Wisp: gas bomber

Rare · Standard · Deploy 5. Gas · Spectral · Airborne · Regenerative · Emotional.

- **Marsh Gas** — Special / Fire, Field-Target, Range 2 (Low), 2 AP, Acc —, max 2. On a tile without gas it creates a Gas Field (3 rounds). Used on a Gas Field it detonates it for Power 80 on the tile and Ring-1. Fire or Electric attacks that cross or hit a Gas Field also detonate it. Explosions hit friends.
- **Flicker** — Special / Fire, Power 35, Range 2, 2 AP, Acc 90, Crit 5%, max 1. Blinds the target for 2 rounds. Afterwards she teleports next to her Candle if it still exists.
- **Ability — Candle:** when deployed she places a Candle on a free tile next to her. At the start of each round it heals her by her max HP × 20% if it is 3 tiles or less away, 15% at 4–6 tiles, 10% beyond 6. It does not stack with Regenerative (the higher value applies). Without a Candle she has no heal and no teleport.

18. Crystal Eye: beam and bomb controller

Epic · Elite · Deploy 7. Crystal · Spectral · Airborne · Perceptive · Emotionless.

- **Prismatic Beam** — Special / Radiant, Power 60 per segment, 3 AP, Acc 85, Crit 8%, max 1. Choose 1 or 2 target tiles. The beam fires from the Eye to tile 1 and, with a second tile, from tile 1 to tile 2. It pierces every unit on the lines. The two segments together are at most 8 tiles long, and a unit is hit once per beam.
- **Orb Bomb** — Special / Radiant, Field-Target, Power 70, Range 3, 2 AP, Acc —, max 1. Places a Crystal Bomb on a free tile. It detonates when an enemy unit enters the tile, in a Star-2 pattern. Casting it on your own bomb upgrades it by +1 arm length and +15% Power, up to 3 times (arms of 5 tiles, Power about 101). At most 2 bombs on the board.
- **Ability — Portal Maker:** when she KOs a unit, an Electric Field opens on its tile as a Portal for 3 rounds. A friendly unit on the Portal may pay 1 AP to appear on a free tile next to the Eye.

19. Termite Mound: immobile wall breaker

Uncommon · Standard · Deploy 5. Organic · Colony · Rooted · Parasitic · Hive Mind.

- **Gnaw Swarm** — Physical / Pierce, Field-Target, Power 50, Range 4 (Mid), 2 AP, Acc —, max 2. If the tile holds a Wall-Obstacle, the wall is destroyed and becomes an Acid Field for 3 rounds. Units crossing it get 1 Corrosion stack (−15% PDef, 2 rounds).
- **Ant Trail** — Physical / Pierce, Power 40, Range 6 (Mid-High), 3 AP, Acc —, max 1. Choose a Wall-Obstacle or a friendly Organic or Colony unit as the end point. A trail forms along the line between the Mound and that point. Enemies on it when it forms take Power 40, and every enemy that crosses or ends on a trail tile takes Power 25 once per round. It lasts 3 rounds, or ends early if the wall or end unit is destroyed or moves, or the Mound is destroyed.
- **Ability — Hive Shift:** 1 AP, max 1 per round. Swap tiles with another friendly Organic or Colony character within 6 tiles. The Mound has Max Move 0 and uses this to relocate.

20. Cymbal Chimp: revenge brawler and AP punisher

Uncommon · Standard · Deploy 4. Synthetic · Artificial · Grounded · Robust · Emotionless.

- **Crash** — Physical / Blunt, Power 40 × (1 + his missing HP%), up to ×2 at 0 HP, Range 1, 2 AP, Acc 95, Crit 5%, max 2. Knockback 1.
- **Echo Clap** — Special / Sonic, Power 20, Range 4 (Mid), 3 AP, Acc 85, max 1. Echo for 2 rounds: the target loses 3% max HP for every AP spent on its actions.
- **Ability — Resonant Rest:** if he is set to Rest, a shockwave bursts when he takes his first action: Power 40 Special / Sonic on Ring-1 with Shock 60%. It leaves a Resonance Field on his tile for 1 round.

New characters, part 1 (21–25)

21. Mambo, Voodoo Witch: healer, link caster, one-time copy

Legendary · Elite · Deploy 7. Organic · Living · Grounded · Perceptive · Devoted.

- **Hex Dart** — Special / Soul, Power 55, Range 5 (Mid-High), 2 AP, Acc 90, Crit 8%, max 2. Her ranged normal attack. It leaves a Hex on the target until the end of next round: the next Spirit Link on that unit deals +25% damage, and so heals 25% more.
- **Spirit Link** — Special / Soul, Power 70, Range 6 (Mid-High), 3 AP, Acc 90, max 1, ignores walls and LOS. The target takes the damage. The total healing equals the damage dealt, split evenly between every other character of the target's team within 3 tiles of the target. The target itself is not healed, healing cannot exceed missing HP, and overflow is lost. With nobody else nearby it is pure damage. Aimed at an ally it moves HP: the ally pays and its neighbours heal.
- **Ability — Voodoo Doll (once per game):** 2 AP, Priority +1. Choose a friendly non-summon character next to Mambo (not a second Mambo or a Boss). A Voodoo copy appears on a free tile next to her. It has the original's stats, first attack and ability, but half of the original's current and max HP, and it counts as a summon. You control it, and it acts at Mambo's Speed because she controls it. Its second attack is replaced by **Pain Link**: Special / Soul, Range 3, 2 AP, Acc 95, using Mambo's SAtk, Power = 150 × the copy's current HP% (minimum 30). Using Pain Link destroys the copy.
- **While the copy lives**, Mambo is Entranced: she cannot move, attack or use abilities. If an enemy destroys the copy, Mambo takes 20% of her max HP as backlash. If Pain Link destroys it, or you pay 1 AP to wake Mambo, there is no backlash. If Mambo is KO'd, the copy disappears.

22. Calaca Flamenca: fire caster that collects souls

Epic · Elite · Deploy 7. Bone · Dead · Grounded · Volatile · Emotional. Day of the Dead skeleton with a marigold garland.

- **Flaming Skull** — Special / Fire, Power 60, Range 5 (Mid-High), 2 AP, Acc 90, Crit 8%, max 2. A flaming skull flies in a straight line and stops at the first unit it meets (no pierce). That unit takes full damage and Ring-1 around it takes 50%. Burn 30%.
- **Marigold Garland** — Support / Soul, Range 4 (Mid), 3 AP, Acc —, max 1, costs 3 Souls. A friendly unit gets Garland for 3 rounds and a Marigold Field under it for 2 rounds. If it is KO'd while the Garland lasts, it returns at the start of the next round on the same tile with 30% max HP, once. The enemy still keeps the KO reward. It cannot target an already revived unit or a Boss.
- **Ability — Soul Collector:** she holds up to 5 Souls. She gains 1 Soul whenever a non-summon unit is KO'd within 4 tiles of her (any team), and 1 more when she KOs a Burning unit. Each Soul gives +4% Fire damage and +3 Speed. Volatile: when she is KO'd she explodes (Ring-1, Power 60 Fire, friend and foe).

23. Moonbound Werewolf: physical tank with a wolf form

Epic · Standard · Deploy 6. Organic · Mythic · Grounded · Predatory · Feral.

	Human form	Wolf form
HP	420	483 (+15%)
PAtk / PDef	70 / 85	95 / 106
SAtk / SDef	40 / 55	20 / 55
Speed / Max Move	85 / 3	106 / 4
Healing received	Normal	−50%
Bleeding	None	His attacks cause Bleeding

- **Claw Rake** — Physical / Slash, Range 1, 2 AP, Acc 95, Crit 10%, max 2. Power 60 (Human) or 85 (Wolf). In Wolf form it causes Bleeding with 100% chance.
- **Moonlit Charge** — Physical / Blunt, 3 AP, Acc 90, Crit 5%, max 1. He runs in a straight line up to 3 tiles (free, not counted as movement) and strikes the first unit in his path with Power 70 (Human) or 95 (Wolf), knockback 1.
- **Ability — Moon Pull:** he becomes a Wolf in one of three ways. (a) Pay 2 AP at Priority +1. (b) Free on Full Moon rounds (every 5th round) and at the start of any round in which he stands on a Moonlit Field. (c) Automatically when his HP falls to 40% or lower. Wolf form lasts 3 rounds. Then he is Human and Exhausted (Speed −15%) for 1 round, and cannot transform again for 2 rounds.

24. Midas Mummy: slow tank with a one-time golden gamble

Legendary · Standard · Deploy 6. Cloth · Cursed · Grounded · Robust · Greedy.

- **Bandage Lash** — Physical / Slash, Power 55, Range 2 (Low), 2 AP, Acc 90, Crit 5%, max 2. Slow 25%.
- **Curse of the Tomb** — Special / Soul, Power 60, Range 3, 3 AP, Acc 85, Crit 5%, max 1. Vulnerable 70% (+20% damage taken for 2 rounds).
- **Ability — Midas Touch (once per game):** 1 AP, Priority +2. Pick 1 item card in your hand. It becomes the **Midas Touch** card. Every other item card of the same Type (Character, Field, Ability, Attack, Gear, Trap or Intel) in your hand, deck and discard pile is Tarnished for the rest of the match and cannot be played. Cards of that Type you draw later are Tarnished too. Tarnished cards may be discarded freely.
- **The Midas Touch card:** Character-type card, Free, playable once per game, never Tarnished itself. Choose a friendly unit. It becomes **Gilded** for the rest of the match: Speed −35%, Max Move −1, PDef and SDef +40%, damage +30%, heals 5% max HP per round, immune to Poison, Bleeding, Burn and Corrosion. If it is KO'd, the enemy gets +5 VP and +3 AP. The card stays usable even if the Mummy is KO'd first.

25. Cog Cuckoo: clock pattern attacker and one-time rewind

Rare · Standard · Deploy 5. Wood · Artificial · Grounded · Chronal · Emotionless.

- **Cuckoo Peck** — Physical / Pierce, Power 55, Range 2, 2 AP, Acc 95, Crit 10%, max 2.
- **Strike the Hour** — Special / Sonic, Field-Target, 3 AP, Acc —, Priority −1, max 1. Choose a centre tile within 3. The 12 tiles at distance 2 around it form the **Clock Ring**, numbered 1 to 12 clockwise with 12 at the top. The **hour hand** is the ring tile whose number equals the current round (round 13 counts as 1, round 14 as 2, and so on). The **minute hand** is the opposite ring tile (number + 6). Damage: hour hand Power 85, minute hand Power 55, centre Power 30. All three tiles become Chrono Fields for 1 round. Before the attack you may pay 1 AP to turn the hour hand one step either way (max once per attack). The enemy can predict the hands from the round number, but not the centre.
- **Ability — Turn Back Time (once per game):** 2 AP, Range 5, Priority −2. Choose a friendly unit, including herself. At the end of the Resolution phase it returns to its tile and HP from the start of this round and loses all negative statuses gained this round. A unit that was KO'd stays KO'd.

New characters, part 2 (26–30)

26. Zombie Limb: cheap blocker that fuses into a brute

Common · Swarm · Deploy 1 (up to 3 copies in a deck). Organic · Dead · Burrowing · Viral · Hive Mind.

Form	HP	PAtk	PDef	SAtk	SDef	Speed	Move	AP/f	KO reward
Zombie Limb	90	40	30	20	30	90	4	0.5	4 VP and 4 AP
Patchwork Zombie (2 parts)	260	65	55	30	50	75	3	0.75	8
Stitched Brute (3 parts)	480	95	75	30	65	60	3	1	10

- **Flail** — Physical / Blunt, Power 30, Range 1, 1 AP, Acc 90, Crit 5%, max 2. Infection 25%.
- **Grab** — Physical / Blunt, Power 15, Range 1, 1 AP, Acc 90, max 1. Snared 60%, which makes it a cheap blocker.
- **Ability — Fuse:** 1 AP, Priority +1, Range 1, max 1. Merge with an adjacent Zombie Limb or Patchwork Zombie. The fused unit takes the tile of the unit that used Fuse. Its current HP is the sum of the parts' current HP (capped at the new max HP), it keeps the longer duration of each status, and it acts normally next round. A fused unit counts as 1 character on the board. Fused forms replace the attacks: Patchwork has **Maul** (Physical / Blunt, Power 55, Range 1, 2 AP, Acc 90, max 2) and **Rend** (Physical / Slash, Power 70, Range 1, 3 AP, Acc 90, max 1, Bleeding 40%). The Brute has **Smash** (Physical / Blunt, Power 80, Range 1, 3 AP, Acc 90, knockback 1, max 1) and **Ground Slam** (Physical / Blunt, Power 60, Ring-1, 3 AP, Acc —, max 1). Fused forms heal 5% max HP per round.
- Burrowing lets the Limbs creep through Wall-Obstacles for +1 AP per wall tile, so they can reach each other where bigger units cannot follow.

27. Baby Mummy: cheap fear source with a curse

Common · Swarm · Deploy 1 (up to 3 copies in a deck). Cloth · Cursed · Grounded · Perceptive · Emotional.

- **Pacifier Toss** — Physical / Blunt, Power 25, Range 3, 1 AP, Acc 90, Crit 5%, max 2.
- **Wail** — Special / Sonic, Burst-2 around her, enemies only, Power 20, 2 AP, Acc —, max 1. Fear 40% for 1 round, and it reveals Hidden units within 2 tiles.
- **Ability — Little Curse:** when she is KO'd, the unit that dealt the final blow gets Jinx for 2 rounds, and her tile becomes a Bandage Field for 2 rounds.

28. Little Wendigo: cheap AP engine and hunger aura

Uncommon · Swarm · Deploy 2. Ether · Mythic · Phasing · Parasitic · Insatiable.

- **Gnaw** — Physical / Pierce, Power 30, Range 1, 1 AP, Acc 95, Crit 5%, max 2. Parasitic: heals 15% of the damage dealt.
- **Starving Mark** — Special / Psychic, Power 20, Range 4 (Mid), 2 AP, Acc 90, max 1. Marks the target for 2 rounds. Whenever a friendly non-Wendigo character damages the marked unit, your team banks +1 Feast AP (max +2 per round), paid at the start of the next round.

- **Ability — Famine Aura:** enemy units within 2 tiles of him at the start of planning pay +1 AP for their first Attack command of the round.

29. Backstabber Lab Assistant: patient healer who stabs later

Rare · Standard · Deploy 5. Organic · Living · Grounded · Predatory · Emotionless.

- **Bedside Manner** — Support, Range 2, 2 AP, Acc —, max 1. Heals the target, ally or enemy, for 12% max HP and marks it **Patient** for 2 rounds.
- **Scalpel Backstab** — Physical / Pierce, Power 65, Range 1, 3 AP, Acc 90, Crit 15%, max 1. ×1.35 against a Patient. ×1.35 if the target is Turned Back, meaning it has finished all its planned actions this round or had none. With both, the total is ×1.8 and she ignores 30% of its PDef. This is why she likes the Rest command: she lets her patients act first.
- **Ability — Quiet Professional:** after Scalpel Backstab she may move up to 2 tiles for free (no AP, not counted toward Max Move). Her plans cannot be revealed by Watchful Eye or similar effects.

30. Leech Cook: broth healer, spawns no units

Uncommon · Standard · Deploy 5. Organic · Living · Grounded · Parasitic · Emotional.

- **Leech Toss** — Physical / Pierce, Power 35, Range 4 (Mid), 2 AP, Acc 90, Crit 5%, max 2. The target is Leeched (3 rounds, one leech per unit): it loses 4% max HP at round end, and every 20 HP drained adds 1 Broth to the Pot (max 6).
- **Serve Stew** — Special / Fire, 3 AP, Acc —, max 1. The Cook must be within 2 tiles of the Pot, and the target within 3 tiles of the Cook. She spends up to 3 Broth. On a friendly unit it heals 8% max HP per Broth, and with 3 Broth the unit is also Well Fed (+10% damage, 2 rounds). On an enemy it deals Power 25 per Broth and applies Burn 40%. With no Broth it heals 5% or deals Power 15.
- **Ability — Pot Luck:** she deploys with a Cooking Pot on an adjacent free tile. It is an object that blocks movement. For 1 AP she can push it 1 tile (max once per round). If it is destroyed, all Broth is lost and the tiles around it become Scalded Fields for 2 rounds. The leeches are only a status, so she spawns no units.

Attack items (AT)

#	Item	Rarity	Cost	Trait	Effect
AT1	Whetstone	Common	1 AP	Steel	The attack's Power +15% and Crit +5%
AT2	Scope	Common	1 AP	Crystal	Range +2 and Accuracy +10 (Character-Target attacks only)
AT3	Poison Coating	Common	1 AP	Toxic	The attack applies Poison with 60% chance

#	Item	Rarity	Cost	Trait	Effect
AT4	Flame Oil	Uncommon	2 AP	Volatile	The attack's tag becomes Fire and it applies Burn with 40% chance
AT5	Heavy Gloves	Uncommon	1 AP	Robust	Adds Knockback 1 and ignores 15% of the target's PDef
AT6	Piercing Rounds	Uncommon	1 AP	Steel	The attack continues through the target and hits up to 2 more units in line behind it for 60% damage
AT7	Chain Link	Rare	2 AP	Conductive	The attack arcs to the nearest other enemy within 2 tiles for 50% damage
AT8	Lifesteal Fang	Rare	2 AP	Parasitic	The user heals 30% of the damage dealt
AT9	Silencer	Epic	2 AP	Perceptive	The attack triggers no reactions (Fake Steak recoil, Ambush Venom, Encore Tokens), does not break Hidden, and ignores Symbiosis redirection
AT10	Executioner's Ledger	Legendary	3 AP	Predatory	The attack never misses and deals ×1.75 against targets at 35% HP or less. A KO with it gives +3 VP extra

Gear items (GR)

#	Item	Rarity	Cost	Trait	Effect
GR1	Bone Charm	Common	1 AP	Bone	+50 max HP (and +50 current HP)
GR2	Lead Boots	Common	1 AP	Steel	Immune to enemy Knockback, Pull, Swap and Teleport. Max Move −1
GR3	Running Shoes	Common	1 AP	Living	Move cost ×0.75 per Move command (minimum 1 AP)
GR4	Insulated Gloves	Uncommon	2 AP	Wood	Electric damage ×0.5 and immune to Shock
GR5	Lucky Coin	Uncommon	2 AP	Greedy	+1 AP at the start of each round while the holder lives. If the holder is KO'd the enemy gets +2 VP
GR6	Night Goggles	Uncommon	2 AP	Perceptive	+10 Accuracy. Sees Hidden units and Traps within 4 tiles. Immune to Blind
GR7	Prism Visor	Rare	3 AP	Crystal	Trait Swap: the wearer's Material becomes Crystal
GR8	Ghost Shroud	Rare	3 AP	Ether	Trait Swap: the wearer's Movement becomes Phasing
GR9	Wolf Pelt	Epic	3 AP	Feral	Trait Swap: the wearer's Mind becomes Feral. This card is exempt from Feral's Gear penalty

#	Item	Rarity	Cost	Trait	Effect
GR10	Aegis Plate	Legendary	4 AP	Steel	PDef and SDef +25%, a Shield of 50 at the start of every round, Speed −10%

Trap items (TR)

#	Item	Rarity	Cost	Trait	Effect when an enemy enters the tile
TR1	Spike Pit	Common	1 AP	Bone	Pierce damage of 15% max HP and Bleeding
TR2	Bear Snare	Common	1 AP	Steel	Snared and Slow. Its movement ends there for this round
TR3	Alarm Bell	Common	Free (req: you have fewer characters on the board than the enemy)	Perceptive	Marked for 2 rounds. Hidden units within 2 tiles are revealed
TR4	Frost Mine	Uncommon	2 AP	Liquid	Ice Field on Burst-1 for 2 rounds, and the unit is Frozen
TR5	Shock Plate	Uncommon	2 AP	Conductive	Shock, and the tile becomes an Electric Field for 2 rounds
TR6	Gas Leak	Uncommon	1 AP	Gas	Gas Field on Burst-1 for 3 rounds
TR7	Acid Mine	Rare	2 AP	Synthetic	Acid Field on 3 tiles around it for 3 rounds, and 1 stack of Corrosion
TR8	Rad Capsule	Rare	3 AP	Crystal	Radiation Field on Burst-1 for 3 rounds, and the unit is Brittle for 2 rounds
TR9	Gag Order	Rare	2 AP	Cloth	Silence for 2 rounds and Weakened for 1 round
TR10	Switchback Rune	Epic	3 AP	Cursed	The enemy unit swaps tiles with one of your units within 6 tiles (your choice when it triggers)

Intel and global items (IN)

#	Item	Rarity	Cost	Trait	Effect
IN1	Scout Card	Common	2 AP	Perceptive	Reveals 1 random unknown card in the enemy's hand. It stays known until played
IN2	Re-Roll Ticket	Common	Free (req: discard 1 other card)	Hive Mind	Re-rolls all unlocked offered characters at no AP cost
IN3	Ration Pack	Common	Free (req: you spent less than 50% of last round's AP)	Organic	+2 AP this round
IN4	Overtime	Uncommon	Free (req: it is the only card you play this round)	Emotional	+4 AP this round and −3 AP next round
IN5	Spy Drone	Uncommon	1 AP	Synthetic	Reveals Hidden units and Traps within 4 tiles of any of your units until the end of next round
IN6	Black Market	Rare	2 AP	Greedy	Look at the top 3 cards of your item deck, take 1, and put the other 2 at the bottom
IN7	Evacuation Order	Rare	3 AP	Living	Return one of your characters (not a summon) from the board to your offered characters, replacing a random unlocked one, and get half its Deploy AP back (rounded up) now. It returns at full HP when deployed again
IN8	False Alarm	Rare	1 AP	Multi-Minded	The enemy gets a fake "enemy deploys a character" pop-up this round, and your real deployments this round show no pop-up
IN9	Customs Inspector	Rare	2 AP	Emotionless	Choose an item Type: the enemy's cards of that Type cost +1 AP next round

#	Item	Rarity	Cost	Trait	Effect
IN10	Backwards Clock	Epic	3 AP	Chronal	Next round the Speed order is reversed (slowest acts first within each Priority). Chronal units ignore this
